

Shohin assigns learned owners across inference time while freezing the host backbone

a Model-owned temporal lifecycle

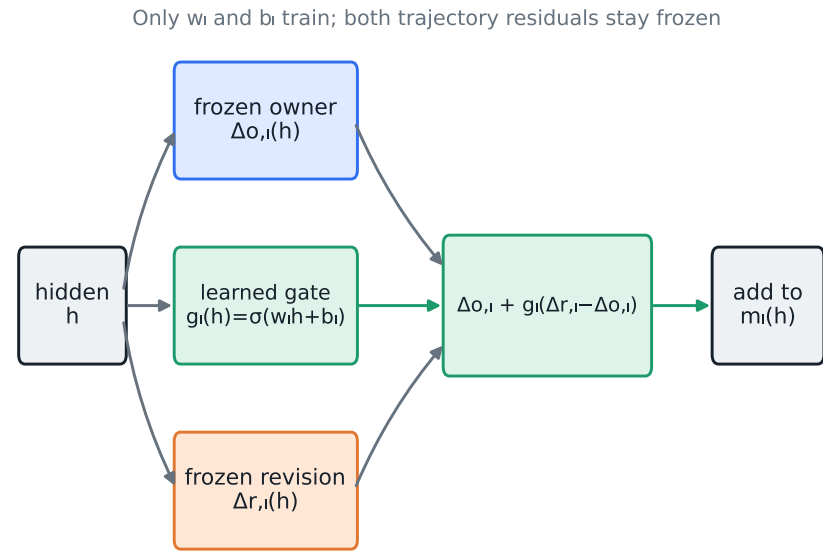

Inference sees no correctness label, verifier, benchmark route, or tool result

b Sparse-host revision surface

Mixtral: rank 18, $\alpha=18$, 3,538,944 trained parameters

c Tokenwise causal ownership

Qwen3.6-35B-A3B: 32,784 gate parameters; response loss only
